Abstract of JP2002132758

PROBLEM TO BE SOLVED: To enable processing of an HTML document containing contents to appear only at the time of printing.
SOLUTION: At the time of printing, first of all, a tag is read out of a document (step 402) and when there is the tag of <PCONTENTS>, that tag is acquired from a URL designated by that tag. Then, an acquired file is rendered (step 411), a master document is rendered as well (steps 404-406) and they are coupled and printed.
